

RF-CABLES **50 Ω**

EC³ : Eupen Corrugated Copper Cables
for radio transmission systems

KABELWERK EUPEN AG

KABELWERK EUPEN AG THE SPECIALIST IN C

The foundation of the cable factory KABELWERK EUPEN AG as manufacturer of electrical cables goes back to the beginning of this century. Today the company has a staff of 950 people producing power cables, telecommunication cables and RF-Cables.

Since broadband transmission became possible, KABELWERK EUPEN AG has been involved in the design and manufacture of coaxial cables.

The introduction of Cable Television in 1962 was decisive for the start of producing coaxial cables on a larger scale.

With the increasing demand for coaxial cables and the intensive R&D to improve cable construction and transmission characteristics, KABELWERK EUPEN AG has become today **one of the leading manufacturer for coaxial cables in the World.**

Over 40 years of experience in the field of RF-Cables, the company constantly developed its extensive manufacturing process bearing in mind the improvement of quality.

In 1999 KABELWERK EUPEN AG developed a new generation of coaxial cable connectors.

Since 1993 **the company is ISO 9001 certified for all its products.**

Today the cables and connectors from KABELWERK EUPEN AG, together is an unbeatable match to guarantee superior performances and long service life.

EC³: Eupen Corrugated Copper Cables

Antenna stations in mobile, cellular, microwave and broadcast communication systems require high quality coaxial cables and connectors for very low loss and high power signal transmission.

EUPEN cables and cable accessories are specifically designed for the needs of modern radio communication systems.

EC³ Cable from Eupen offers better electrical performance and greater durability than conventional corrugated copper cables. It is the best choice for UMTS, PCS, cellular antenna feeder cables and other wireless communication applications requiring a cable with the lowest loss and best long term durability. The more durable construction of the EC³ Cable allows us to offer the best warranty in the industry – 12 years.

The electrical specifications of the EC³ Cable are unsurpassed. Every reel is swept for attenuation and return loss before it leaves the factory. Return loss is typically 30 dB and guaranteed to be at least 23 dB over the cellular and PCS bands, when the cable is terminated with EC³ Connectors. Attenuation specifications are the best in the industry.

EC³ Connectors are the easiest attaching corrugated copper cable connectors

made. No soldering is required for the attachment of any of the connectors. High quality silver plating is used on all parts in the electrical path, with electroless nickel plating on all mechanical parts.

They feature superior electrical performances.

EC³ Cables are offered in sizes ranging from 1/4" to 2 1/4". A full range of type N, DIN and EIA EC³ Connectors are available to complete the package, including hanging and grounding accessories, as well as other accessories needed to complete installation.

In addition to the cables in this catalogue we can provide:

- **Phase stabilised, phase measured cable**
- **Low VSWR microwave versions**
- **Special colours**
- **Flooded versions**
- **Cable assemblies**

Our quality products are delivered fast and on time, saving you also time and money. Eupen has a staff of engineers to provide complete technical support for our products and to help you to select the best cable for your application. We can provide training to assure the best installation of your system.

EC³

MICROCELL FOAM DIELECTRIC

EUPEN cables feature innovative design, careful choice of raw materials, consistent manufacturing and quality assurance techniques.

The result is a coaxial cable with superior electrical and mechanical performance.

Our coaxial cable design with low density cellular polyethylene foam dielectric and ring-corrugated copper outer conductor and our 40 years of experience in manufacturing these cables are your guarantee of the supply of a technically optimal construction, featuring:

- **lowest loss**
- **excellent flexibility**
- **excellent RF shielding**
- **very low VSWR**
- **easy and reliable installation of connectors**

The cable **inner conductor** is constructed from copperclad aluminium wire, copper tube or corrugated copper tube, depending on the cable size.

The **microcell-dielectric** is a cellular polyethylene foam manufactured by a proprietary process using ozone friendly expansion gas. A high foaming ratio guarantees low attenuation.

The foam dielectric is bonded to the inner conductor by a precoating layer. This layer ensures good adhesion of the

dielectric to the inner conductor. It also permits easy, clean removal of the dielectric during connector installation.

The ring-corrugation of the copper **outer conductor** captures the dielectric mechanically and ensures good adhesion to the dielectric. This construction prevents relative movement between the inner and the outer conductor due to bending, pulling and temperature variations.

The standard cable construction uses an all weather-resistant black (or grey) **outer sheath**, suitable for indoor, outdoor or underground installation. UV protection is provided by 3% carbon black.

For applications requiring flame-retardance, coaxial cables are available with a flame retardant and halogen free outer sheath. This construction meets international standards for flame propagation, such as IEC 60332-3, smoke density IEC 61034 and acidity of evolved gases IEC 60754-2.

For very severe installation requirements, cable constructions with steel tape or wire armouring are available.

The coaxial cable construction and specification are in accordance with **spec. MIL – C – 28830.**

Halogen Free & Fire resistant

HALOGEN FREE and FIRE RESISTANT features

Test on *flammability*

STANDARD

5328X

Cable type : 5328X
Reference : EC6-50-HF

Cable with standard UV resistant PE jacket, halogen free according to IEC 60754

FLAME RETARDANT

HLFR

Cable type : 5328-HLFR
Reference : EC6-50-HF-FR

Cable with UV resistant, halogen free and flame retardant jacket according to IEC 60754, IEC 60332-1 and IEC 60332-3 Cat. C

CHARACTERISTICS

Construction

• Inner conductor		
Material		corrugated copper tube
Diameter (mm)		13.6
• Dielectric		
Material		gas-injected cellular polyethylene
Diameter (mm)		33.5
• Outer conductor		
Material		corrugated copper tube
Diameter (mm)		36.0
• Outer sheath		
Material		black polyethylene
Thickness (mm)		1.5
Diameter (mm)		39.0

Mechanical

• Minimum bending radius	
a) single bending (cm)	20
b) 15 repeated bends (cm)	30
• Maximum pulling strength (daN)	200
• Recommended temperature range	
- Storage	-70 to +85°C
- Installation	-40 to +60°C
- Operation	-55 to +85°C
• Maximum length per hoisting grip (m)	70
• Maximum hanger spacing	1.4
• Flat plate crush resistance (kg/mm)	3.4
• Bending moment (Nm)	25
• Weight (kg/km)	830

Electrical

• Characteristic impedance (Ω)	50 ±1
• Nominal capacity (pF/m)	76
• Relative propagation velocity (%)	88
• Inductance (μH/m)	0.190
• DC-resistance at 20°C	
- inner conductor (Ω/km)	1.8
- outer conductor (Ω/km)	0.5
• RF peak voltage (kV)	4.25
• RF peak power (kW)	180
• Cut-off-frequency (GHz)	3.3
• Insulation resistance (MΩ.km)	>>5000

Specification of N-connectors 7/16 connectors

Electrical

	N-connectors	7/16 connectors
• Nominal impedance (Ω)	50	50
• Reflection coefficient at 3 GHz	0.02	0.02
• Insulation resistance (G Ω)	≥ 5	≥ 10
• Test voltage (at sea level) (kV rms, 50 Hz)	2.5	4
• Working voltage (at sea level) (kV rms, 50 Hz)	1	2.7
• Screening effectiveness up to 1 GHz (dB)	>128	>128
• Outer contact resistance (m Ω)	≤ 1	≤ 1
• Inner contact resistance (m Ω)	≤ 1	≤ 1

Mechanical

	N-connectors	7/16 connectors
• Torque of coupling mechanism (Nm)	≤ 8	≤ 30
• Cable retention (N)	>500	>1000

Environmental

	N-connectors	7/16 connectors
• Temperature range ($^{\circ}\text{C}$)	-40 to +85 $^{\circ}\text{C}$	-40 to +85 $^{\circ}\text{C}$
• Degree of protection (humidity)	IP67, IP68	IP67, IP68

Materials

	N-connectors	7/16 connectors
• External parts	Passivated silver plated or electroless nickel plated brass	Passivated silver plated brass
• Outer contact	Passivated silver plated brass	Passivated silver plated brass
• Inner contact	Passivated silver plated Cu alloy	Passivated silver plated Cu alloy
• Dielectric	TPX/PTFE	TPX
• Gaskets	High quality silicone	High quality silicone

**STANDARD**

5228

Cable type : 5228
Reference : EC5-50

Cable with standard UV resistant PE jacket, halogen free according to IEC 60754

FLAME RETARDANT

HLFR

Cable type : 5228-HLFR
Reference : EC5-50-FR

Cable with UV resistant, halogen free, low smoke, flame retardant jacket according to IEC 60754, IEC 60332-1, IEC 60332-3 Cat. C and IEC 61034

CHARACTERISTICS**Construction**

- **Inner conductor**
 - Material smooth copper tube
 - Diameter (mm) 9.1
- **Dielectric**
 - Material gas-injected cellular polyethylene
 - Diameter (mm) 23.5
- **Outer conductor**
 - Material corrugated copper tube
 - Diameter (mm) 25.0
- **Outer sheath**
 - Material black polyethylene
 - Thickness (mm) 1.4
 - Diameter (mm) 28.0

Mechanical

- **Minimum bending radius**
 - a) single bending (cm) 10
 - b) 10 repeated bends (cm) 25
- **Maximum pulling strength** (daN) 170
- **Recommended temperature range**
 - Storage -70 to +85°C
 - Installation -40 to +60°C
 - Operation -55 to +85°C
- **Maximum length per hoisting grip** (m) 70
- **Maximum hanger spacing** 1.2
- **Flat Plate Crush resistance** (kg/mm) 1.7
- **Bending moment** (Nm) 14.5
- **Weight** (kg/km) 530

Electrical

- **Characteristic impedance** (Ω) 50 \pm 1
- **Nominal capacity** (pF/m) 76
- **Relative propagation velocity** (%) 88
- **Inductance** (μ H/m) 0.190
- **DC-resistance at 20°C**
 - inner conductor (Ω /km) 1.05
 - outer conductor (Ω /km) 1.0
- **RF peak voltage** (kV) 3.0
- **RF peak power** (kW) 90
- **Cut-off-frequency** (GHz) 5.3
- **Insulation resistance** (M Ω .km) >>5000

• Fixing clamps		see page 36
• Additional Weatherproofing		see page 39

Specification of N-connectors 7/16 connectors

Electrical

	N-connectors	7/16 connectors
• Nominal impedance (Ω)	50	50
• Reflection coefficient at 3 GHz	0.02	0.02
• Insulation resistance (G Ω)	≥ 5	≥ 10
• Test voltage (at sea level) (kV rms, 50 Hz)	2.5	4
• Working voltage (at sea level) (kV rms, 50 Hz)	1	2.7
• Screening effectiveness up to 1 GHz (dB)	>128	>128
• Outer contact resistance (m Ω)	≤ 0.5	≤ 0.5
• Inner contact resistance (m Ω)	≤ 1	≤ 1

Mechanical

	N-connectors	7/16 connectors
• Torque of coupling mechanism (Nm)	≤ 8	≤ 30
• Cable retention (N)	>400	>1000

Environmental

	N-connectors	7/16 connectors
• Temperature range ($^{\circ}\text{C}$)	-40 to +85 $^{\circ}\text{C}$	-40 to +85 $^{\circ}\text{C}$
• Degree of protection (humidity)	IP67, IP68	IP67, IP68

Materials

	N-connectors	7/16 connectors
• External parts	Passivated silver plated or electroless nickel plated brass	Passivated silver plated brass
• Outer contact	Passivated silver plated brass	Passivated silver plated brass
• Inner contact	Passivated silver plated Cu alloy	Passivated silver plated Cu alloy
• Dielectric	PTFE	TPX/PTFE
• Gaskets	High quality silicone	High quality silicone

EGK214

JUMPER CABLES

EUPEN offers jumper cables with 1/2" Hiflex cable (5092 / EC4-50-HF) or 1/2" standard cable (5128 / EC4-50) with soldered DIN 7/16 or N type straight and right angle connectors.

All metal contact parts are silver plated. They are designed for watertight applications and optimised jumper cable performances.

Features

- excellent return loss values
- very low bending radius
 - 30 mm for 1/2" Hiflex (5092) for single bending (36 mm for repeated bendings)
 - 70 mm for 1/2" standard (5128) for single bending (125 mm for repeated bendings)
- very low level of 3rd order intermodulation products
- easy, fast and reliable installation
- water tightness according to IP 68 (according EN 60529)
- longitudinal water tightness is provided by the special connector design (inner and outer conductors are soldered)
- the overmolding of the connector provides an additional mechanical stability

Product reference

EC4-vv-S-*www*-XYZXYZ

EC4 = 1/2" cable (5128)

vv = HF for Hiflex (5092)

S = soldered connector

www = length in cm

x = D for DIN 7/16 type connector

or **x** = N for N type connector

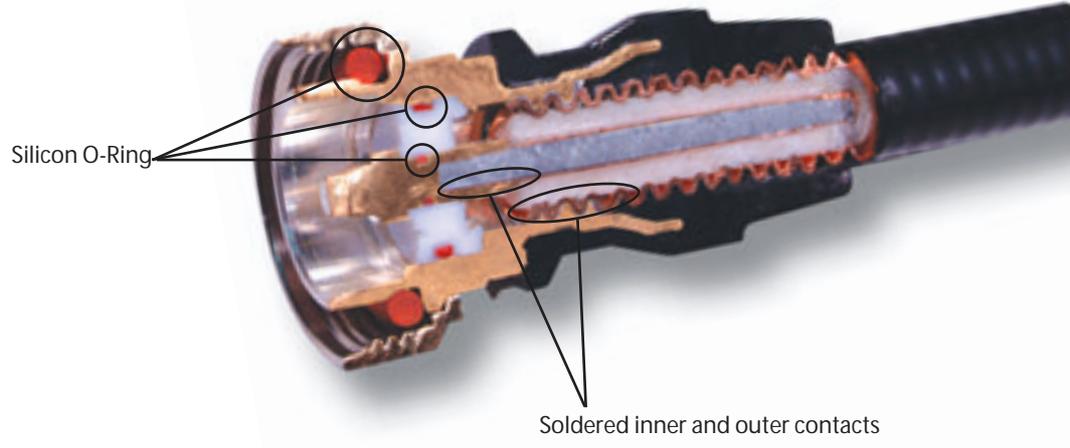

y = M for male or F for female

z = L for right angle connector

Marking

Manufacturer EUPEN - Week & Year of Production -
Product Ref. - Part N° EUPEN - S/N - coupling torque

Specification of 1/2" Hiflex jumpers 5092 / EC4-50-HF

ACCESSORIES FOR CABLES

1. adapters

Eupen offers a wide range of inside-series and inter-series 7/16 DIN and N type adapters designed in **standard** and **precision** models.

Main features:

- Low reflection coefficient up to 3 GHz
- Low PIM (-162dBc)
- Cu-Be inner contacts for high contact force
- Silver plated
- Watertight IP68
- Corrosion resistant

a. Standard adapters

Standard adapters are characterised by a minimum Return loss of -34 dB up to 3 GHz.

<i>Description</i>	<i>Reference</i>
N male to 7/16 male	CAD50NM716M
N female to 7/16 male	CAD50NF716M
N male to 7/16 female	CAD50NM716F
N female to 7/16 female	CAD50NF716F
N male to N female	CAD50NMF
N male to N male	CAD50NMM
N female to N female	CAD50NFF
7/16 male to 7/16 female	CAD50716MF
7/16 female to 7/16 female	CAD50716FF
7/16 male to 7/16 male	CAD50716MM

For applications where high electrical performances

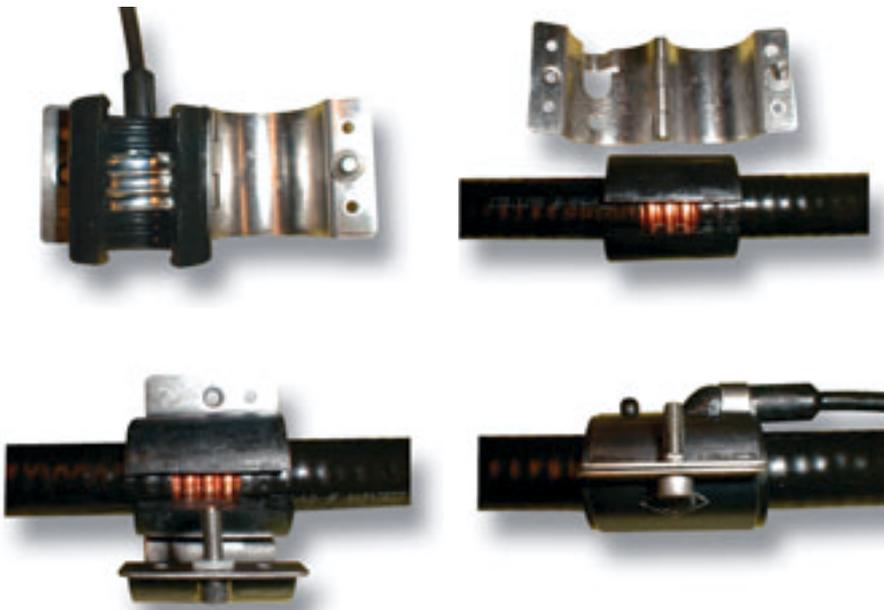

B. Precision adapters

and very low return loss are requested, and where high precision measurement equipment is requested - such as field test application in the cellular communication - we offer high precision adaptors featuring lowest return loss with guaranteed minimum -40 dB up to 3 GHz.

<i>Description</i>	<i>Reference</i>

2. grounding cl amps

grounding cl amps with parallel outlet

The optimal grounding of the transmission line antenna to base station is a very weak point. In order to guarantee the best grounding we recommend the use of the EUPEN grounding clamps in order to ground the coaxial outer conductor to the antenna tower or ground wire. The main features of the Eupen grounding clamps are:

- **Ultra quick and easy installation**
- **No loose parts**
- **Lightning resistant to 100kA lightning current (wave type 10/350 μ s)**
- **Very low contact resistance < 1mOhm**
- **Waterproof according IP68 (5 m of water 2,5 hours) without additional tape or sealant**
- **Corrosion resistant**
- **Re-usable**

3. Fixing clamps

Eupen offers a large variety of clamps for different applications and steel ladder profiles in order to match customer's request.

Please don't hesitate to contact us for further details.

a. Eucatec cable clamps

QCC

- Standard C-Profile
- Flat section up to 11 mm
- Pipes up to D=12 mm

QCCP

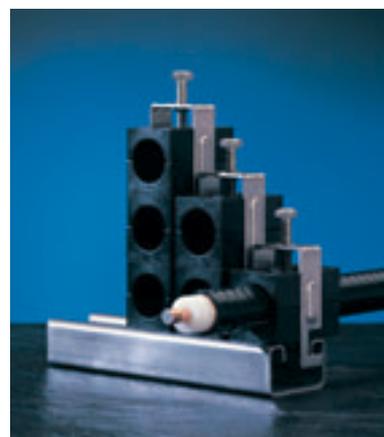

- Flat section up to 10 mm
- Pipes up to D=10 mm

QCU

- Standard C-Profile
- Flat section up to 25 mm
- Pipes up to D=23mm

All EUCATEC Cable Clamps are available in single, double or triple version.

B. Stainless steel clip Hangers

ES 90

- For flat plate or angle: Type ES 90
- For round tubes or bars: Type ES 91
- For fixing with collar: Type ES 92

C. Various fixing clamps

Other clamp types available on request:
clip hanger, snap-in hanger, multiple
cable clamps, RFB/RFM (FIMO) ...

4. Hoisting grips

We offer two types of hoisting grips: the lace-up one and the pre-laced one.

Please refer to the table below.

Hoisting grips are used to raise the cable up the tower. They can be tied off as a permanent support. Use one hoisting grip for every 60 m cable length.

The hoisting grips are manufactured from high-grade tin coated bronze to provide highest corrosion resistance.

HOISTING GRIPS

Reference	1/2" cable	7/8" cable	1 1/4" cable	1 5/8" cable
Lace-up type	HG-12	HG-78	HG-114	HG-158
Pre-laced type	HG-12-L	HG-78-L	HG-114-L	HG-158-L

5. seal ant sil-744 for connectors with seal ant injection

In outdoor installations the Connector/Cable interface is very sensitive to water ingress.

The Sealant injection waterproofing method creates a quick, secure seal between the back nut and jacket / outer conductor.

The SIL-744 is recommended to be used with all EUPEN connectors where sealant injection is required.

The SIL-744 is supplied either in a box with a 90 ml tube of sealant including connector adapter and key or in a tube containing 310 ml.

With one tube the following quantities of connectors can be sealed:

SIL-744

Reference	3/8"	1/2"	7/8"	1 1/4"	1 5/8"	2 1/4"
with 90 ml tube	26...30	20...25	13...15	7...9	4...5	3...4
with 310 ml tube	90...103	69...86	44...51	24...31	13...17	10...13

6. Additional weatherproofing solutions

a. weatherproofing tape kit

If additional weatherproofing is required, it can be obtained with appropriate adhesive tapes wrapped around the cable/connector interface.

Eupen supplies a weatherproofing tape kit for additional protection of connector, cable and jumper interfaces. The tape kit includes selffusing butyl tape (65 mm x 2 m) and black PVC tape (25 mm x 10 m).

The following table indicates the quantity of connectors or splices which can be protected by tape kit:

WEATHERPROOFING TAPE KIT

Cable/Connector	1/4" & 3/8"	1/2" & 1/2"X	7/8"	1 1/4"	1 5/8"
Single connector	10	9	7	5	3
Splice	6	5	4	3	2

b. eucaseal

The Eucaseal is an additional and optional gel closure sealing system that provides a reliable sealing of coaxial connectors used at the transition between:

- jumper and antennas or the electric devices like TMA'S
- jumper and feeder cables exposed to the outside environment

Benefit

The housing contains an innovative gel material and provides an efficient moisture block. The ease of installation and the long-term protection makes it a reliable and cost effective solution.

ES-12-78

ES-12-114

Features

- Reliable protection over a wide temperature range: -30°C to 60°C
- Wraparound and no disconnection of the connector
- Quick and easy to install
- Easily removable and re-usable
- Gel material provides an effective barrier against ingress of water and other contaminants - IP 68 acc. EN 60529
- No tape, no mastics or tools required for installation and removal
- UV resistant
- Tested under extremely severe conditions, vibrations (acc. IEC 60068-2-6 Test Fc) and temperature cycles (acc. IEC 60068-2-14 Test Nb)
- Protection against excessive bending of the cable.

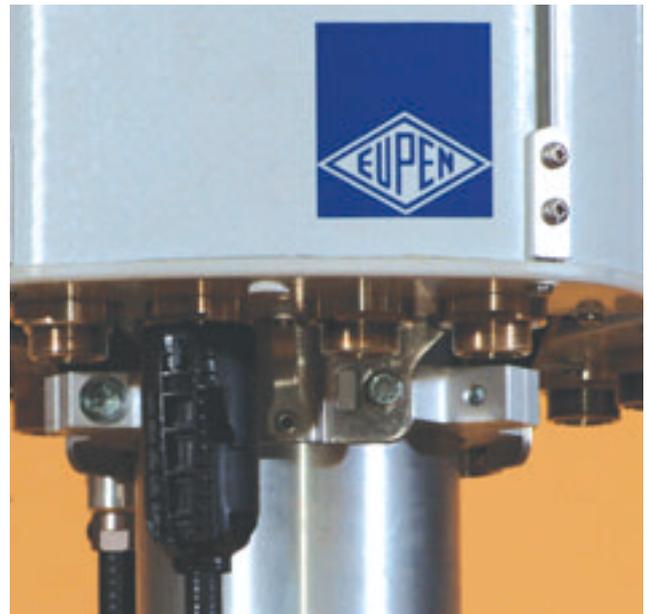

ES-12-158

ES-12-BOX

CABLE PACKING AND HANDLING INFORMATION

The coaxial cable will be supplied on wooden drums made of planed wooden boards or plywood. In order to protect the cable during transportation and storage, the drums will be battened with wooden boards nailed on the flanges.

The drums are provided with a label containing cable information as cable type, cable length, production batch as well as handling information such as indication of the reeling direction (see label on right). The drums can be impregnated on request.

The standard drum sizes used for the different cable types are shown in the table below.

<i>Cable type</i>	<i>Drum type</i>	<i>Cable length</i> (m)	<i>Outer dim. *</i>	<i>Drum dim.</i>
