

EC6-50A Series Ultra Low Loss Coaxial Cable

Having successfully launched the EC7-50A Series Ultra Low Loss 1⁵/₈" Coaxial Cable, Eupen Cable announces the introduction of the

Eupen EC6-50A Series Ultra Low Loss 1¹/₄" Cable.

Main Features & Benefits:

- Lowest Attenuation of any 1¹/₄" Loss Coaxial Cable available on the world market.
- Substantial Cost Savings can be achieved in many cases by using an EC6-50A 1¹/₄" cable in place of traditional 1⁵/₈" Coaxial Cables.
- Bending Moment 7.5% lower than previous Model
- High Crush Resistance
- 100% Connectors & Tools compatibility with previous Model.
- 100% Fixings & Accessories compatibility with previous Model.

The improved EC6-50A replaces the EC6-50 with immediate effect.

Technology Driven

Eupen EC6-50A coaxial cable and connectors are designed for today's stringent network requirements and optimized for UMTS applications. Eupen's rugged, flexible corrugated construction and watertight connectors leads the industry in electrical and mechanical benefits.

Totally Watertight.

Eupen connectors are designed to prevent water ingress and exceed industry standards by passing the severe IP67/68 tests.

Dynamic PIM.

The advanced connector design guarantees low PIM is maintained in the harshest of conditions to ensure premium system performance over long service life of the System.

Eupen Quality.

Eupen's EC6-50A cable and connectors offer premium performance while maintaining the rugged quality that made Eupen the innovative leader in coaxial cable design.
